Encrypted Data Transfers
HIPAA Hide Buttons
Password Expiration
System Change Log
User Action Logs
User Self Service

Supports
Two-Factor Authentication
Two-Step Authentication
Biometric Fingerprint
Readers
Proximity Card Login
PIN Numbers

The Retour has the approval of most major fiscal intermediaries for Medicare Parts A and Part B, CMS 837 4010/A1 and CMS 835, and Medicaid State approvals and our HIPAA Claims Transmissions are Claredi Certified.

Plus all our software supports National Standards for Transactions as well as the most recent Data Sets available for Nursing Home claim submissions to ensure that client systems are always current with the changes mandated by intermediaries.

Transaction / Code Sets
Currently Intermediaries only accept Transaction / Code Sets for Medicare-A, Medicare-B and Physician Billing. So while other Transaction / Code Sets have been developed, the services from the Intermediaries are not in place.

ADL transaction code tables are based on May 2000 ANSI ASC X12N HIPAA Implementation Guides.

Number	Description	Status
270	Eligibility Request	Yes
271	Eligibility Response	Yes
276	Claim Status Request	Yes
277	Claim Status Response	Yes
278	Claim Review Request	Yes
278	Claim Review Response	Yes
820	Premium Payment	Not Applicable
834	Enrollment	Yes
835	Claim Payment	Yes
837	Professional Claim	Yes
837	Dental Claim	Pending

Security
Retour provides additional layers of security and login on top of the Windows Active Directory to ensure that our Extensive security features restrict unauthorized users from logging into and accessing the system.

Identifiers
HIPAA regulations require the use of special identification numbers. ADL software supports both the EIN and the UPIN numbering methods.

National Provider Identifier (NPI)
A universal identifier used to enumerate all types of health care providers, and supporting data structure that incorporates a comprehensive list of provider types developed by an ANSI Accredited Standards Committee X12N workgroup.

Employer ID Number (EIN)
The national employer identifier EIN number identifies the employer in health transactions.
